paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 175 Publisher: Science Press Pub. Date :2007-04. Huge steel structure is developed in recent years has broad application prospects of a new high-rise building system. This book describes: the concept of massive architecture. application and development; giant steel column space of restoring force characteristics of experimental and theoretical analysis; mega-frame structure. large-scale support frame tube structure and a support structure of the mega-frame design principles. the structure characteristics of static and seismic performance of structural performance and design parameters affect the performance; mega-frame support structure of a new energy system and the system damping performance and energy consumption to support the different layout of the structure damping effect and so on. Book for civil engineering professional scientific and technical personnel. teachers and graduate institutions of higher learning reference. Contents: Preface Chapter 1 Introduction 1.1 high-rise building a giant steel structure system 1.2 architecture concepts. application and development of architecture and engineering giant 1.2.1 instance 1.2.2 Research massive architecture of the giant structure of the system 1.2.3 trends in Chapter 2. the giant steel column space of restoring force characteristics of experimental and theoretical analysis of the giant steel column space 2.1 Study on restoring force characteristics of experimental model and load devices 2.1.1 2.1.2 2.1.3 Test material content measurement 2.2 Methods 2.1.4 to load the program and test results analysis and numerical simulation results analysis 2.2.2 2.2.1 2.3 Numerical simulation of the giant steel column space recovery Four Satisfaction guaranteed, or money back.
