

Analytic-Bilinear Approach to Integrable Hierarchies (Paperback)

Filesize: 5.68 MB

Reviews

This is actually the finest pdf i have got study right up until now. It can be full of wisdom and knowledge Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Reese Morissette II)

ANALYTIC-BILINEAR APPROACH TO INTEGRABLE HIERARCHIES (PAPERBACK)

Springer, Netherlands, 2012. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.The subject of this book is the hierarchies of integrable equations connected with the one-component and multi component loop groups. There are many publications on this subject, and it is rather well defined. Thus, the author would like to explain why he has taken the risk of revisiting the subject. The Sato Grassmannian approach, and other approaches standard in this context, reveal deep mathematical structures in the base of the integrable hierarchies. These approaches concentrate mostly on the algebraic picture, and they use a language suitable for applications to quantum field theory. Another well-known approach, the α -dressing method, developed by S. V. Manakov and V.E. Zakharov, is oriented mostly to particular systems and exact classes of their solutions. There is more emphasis on analytic properties, and the technique is connected with standard complex analysis. The language of the α -dressing method is suitable for applications to integrable nonlinear PDEs, integrable nonlinear discrete equations, and, as recently discovered, for the applications of integrable systems to continuous and discrete geometry. The primary motivation of the author was to formalize the approach to integrable hierarchies that was developed in the context of the α -dressing method, preserving the analytic structures characteristic for this method, but omitting the peculiarities of the constructive scheme. And it was desirable to find a start.- Softcover reprint of the original 1st ed. 1999.
