

## Structural Adjustment Program and Agricultural Tradables

By Victor Alaofin

Peter Gmbh Lang Aug 1999, 1999. Taschenbuch. Condition: Neu. Neuware - The IMF/World bank Structural Adjustment Programmes (SAP) have been the subject of intense academic debate since their wide adoption, particularly in Sub-Saharan African countries. The present study analyses the effects of the SAP on tradable agriculture in Nigeria using the example of cocoa farming. Based on the dependent economy framework, the study examines how far economic prerequisites required for the successful structural transformations were met in the Nigerian case. Questions relating to the magnitude and length of real devaluation were empirically investigated. Furthermore, the quantum of changes in relative incentives between agricultural tradables and non tradables were analysed using the policy analysis matrix. The study also examined the factors that constrain the achievement of intended policy objectives. These include among others, dualistic institutional regulations and the effects of multiple exchange rates. Based on the findings, policy reforms were then suggested. 188 pp. Englisch.

### Reviews

*Without doubt, this is actually the best operate by any article writer. Indeed, it can be perform, nonetheless an interesting and amazing literature. Its been written in an exceedingly straightforward way in fact it is only soon after i finished reading through this book through which in fact changed me, modify the way in my opinion.*

-- **Miss Elissa Kutch V**

*Very good e-book and valuable one. It can be writer in basic words and phrases and not confusing. You will not really feel monotony at whenever you want of your own time (that's what catalogues are for concerning should you check with me).*
